

Alphacool article number: 15386

Aquatuning article number: 1019834

The Alphacool ES 4U reservoir offers many connection options and fits perfectly into a 4U server rack. Due to its cuboid shape, up to 300ml coolant can be stored in a very small space. This ensures long maintenance intervals for water cooling.

Alphacool ES 4U

- 300ml capacity
- 5x G1/4" thread
- Compact and suitable for 4U cases
- Patented locking screws
- Blue LED illumination

We assume no responsibility for any typing errors.

Alphacool International GmbH, Marienberger Strasse 1, 38122 Braunschweig Tel: (+49)0531 288 740 Supportmail: info@alphacool.com

Scope of delivery

1x ES 4U reservoir

Data radiator

L x W x H	105 x 82,2 x 78,2 mm
Material 1	POM
Material 2	Acrylic glass
Threads	5 x G1/4"
LED	2 x LED strips with 6 LEDs each
Color LED	Blue
Connection LED strips	1 x 3-pin Molex each

Article text

The Enterprise Solution reservoir for 4U enclosures offers many connection options and a high filling volume for water cooling systems that enables them to run as long as possible without maintenance.

Installation

On the bottom side there are mounting possibilities for four M3 screws to mount the reservoir at any position in the case. The screw holes are spaced 60 and 30 mm apart. The connection possibilities are more than extensive, with five G1/4" thread entries at the front and rear.

Structure

The reservoir can hold up to 300ml of liquid. The case consists of PMMA and is therefore extremely robust. The front and back are made of 9 mm thick, transparent acrylic. Two LED strips, each with 6 blue shining LEDs, facilitate reading the filling level.

Three of the G1/4" threads are based on Alphacool's patented system, which allows the plugs to be flush with the housing.
