Packaging dimensions 1 unit

| | |
|-----------|------------------|
| L x B x H | 26 x 26 x 1,5 cm |
| Weight | 275 g |

Other data

| | |
|--------------|---------------|
| Certificates | CE, FC, RoHS |
| EAN | 4250197175340 |
| Customs code | 39173200900 |

Article text

A water cooling system consists of many different elements. Pumps, radiators, cooling blocks, reservoirs and often other components. In order to build up a functional water cooling system, these components must of course be connected to each other. The easiest way to do this is use tubing. Here the Alphacool AlphaTube HF tubing is the best choice.

Optics

In different vivid colors, clear and also UV-active. The AlphaTube HF tube offers a large selection of different colours and styles making it easy to find the hose that best suits your taste.

Application

The AlphaTube HF tubing has the perfect flexibility to be easily installed. It is flexible enough to be laid without effort, but at the same time rigid enough that it will not kink easily, even with tighter bending radii.

Available in different sizes.

We offer the AlphaTube HF hose in all common sizes.

We assume no responsibility for any typing errors.
